

Admission tests

When you apply to the International Baccalaureate programme you will be invited to an Entrance criteria day at Katedralskolan. The Entrance criteria day is usually a day in the beginning of March.

The Entrance criteria day includes:

- English tests
- Mathematics test
- Group interviews in Swedish (or English if requested)
- IB information

You will meet many of the IB teachers and the other applicants to your IB class.

You will also be able to ask all kinds of questions about the programme.

Testing procedures:

The tests are approximately 3 x 30 minutes in total.

The testing in English includes a short listening comprehension, a reading comprehension, a grammar test and a short written test.

The test in Mathematics includes basic mathematical skills equivalent to Swedish year 9.

Who will get an invitation to the Entrance criteria day?

Only applicants who ranks the IB programme at Katedralskolan Skara as first or second choice are guaranteed to be invited.

Evaluation:

The evaluation of applicants will be based of both the results of the Entrance criteria day and the grades from year 9 (or equivalent documentation). Each applicant will be evaluated on an individual basis.

Preparations:

If your spoken English language is better than your spoken Swedish you should ask for the interview to be held in English. You ask for this when you reply to the invitation for the Entrance criteria day.

You are welcome to contact us if you have questions about these tests or other things concerning our programme!
